## CODING-REPORTS

To assist users of Operator Reports, we have identified each report by a code number. The code number contains the Company name, the type of work carried out, and the area covered by the report. For example:

Report No. 7-1-5-1

7 – refers to company or operator

1 – type of work

5 – area worked

1 – numerical sequence of reports as received from companies of firms

e.g., Imperial Oil Ltd. submitted a geological surface report on the Mackenzie Plains.  
It was the first report received from the Company.

## TYPE OF WORK

1. Surface Geologic Mapping
2. Geophoto Interpretation
3. Geological Evaluation (Multiple program including sub-surface information)
4. Geochemical Surveys
5. Underwater Geological Projects (includes dredging)
6. Seismic (land)
7. Aeromagnetometer
8. Gravity Meter
9. Marine Seismic
10. Geophysical Projects (research oriented)
11. Wildcat Wells (includes outpost wells)
12. Development Wells
13. Service Wells
14. Structure Test Holes (stratigraphic drilling)
15. Drilling (studies or research)
16. Roads
17. Airstrips
18. Transportation
19. Pipelines
20. Communications (electronic)
21. Research

## GEOLOGIC AREAS-NUMBERS

- |                                 |   |
|---------------------------------|---|
| 1. Liard Plateau                | — Includes all of disturbed sedimentary belt in Liard area.                             |
| 2. Eagle Plain                  | — This would include all of central Yukon, but not Old Crow area.                       |
| 3. Yukon Arctic Coastal Plains  | — Includes all on-shore areas.  |
| 4. Great Slave Plain            | — North to Latitude 63°   |
| 5. Great Bear Plain             | — Includes Mackenzie Plains.  |
| 6. Peel Plateau                 | — Includes Peel Plain.  |
| 7. Delta Area                   | — Includes Anderson Plain.  |
| 8. N.W.T. & Y.T. Off-Shore Area | — Includes all off-shore areas in the Beaufort Sea-Mackenzie Bay south of Banks Island. |
| 9. Banks Islands                | — All of Arctic Islands south of Lancaster Sound.                                       |
| 10. Arctic Islands              | — Queen Elizabeth Group of Arctic Islands.  |
| 11. Pacific Coast               | — Off-shore area West Coast.  |
| 12. Foxe Basin                  | — Hudson Bay islands, Foxe Basin and off east coast of Baffin Island.                   |
| 13. Gulf of St. Lawrence        | — West of Cabot Strait.   |
| 14. East Coast                  | — Includes Grand Banks.   |
| 15. Yukon                       | — All of Y.T.   |
| 16. N.W.T.                      | — All of the N.W.T.   |
| 17. Arctic Islands              | — All of the Arctic Islands   |
| 18. Canada Lands                | — Lands administered by the Dept. of I.A. & N.D.  |

Areas 11, 13, 14 are almost all exclusively under the administration of the Department of Energy, Mines and Resources.

**OIL AND MINERAL DIVISION  
DEPARTMENT  
OF  
INDIAN AFFAIRS AND NORTHERN DEVELOPMENT**

**Technical Reports Available for Inspection**

Geological and Geophysical reports released from Confidential status are open for inspection and perusal at the office of the Oil and Gas Land and Exploration Section, 112 – 11th Ave., S.E., Calgary, Alberta, pursuant to Section 107 of the Canada Oil and Gas Land Regulations. In this circular the current official name of the company is used; reports from its predecessors are included under its former name.

**SECTION A  
GEOLOGICAL AND GEOPHYSICAL REPORTS**

**Amerada Petroleum Corporation**

Report No.	Report
86–1–2–1	Preliminary Geological Report – Eagle Plain by Bullock & Hughes
86–1–2–2	Preliminary Geological Report, Porcupine Plateau Group by Bullock, Hughes & Tillman Ltd.
1–1–2–3	Preliminary Geological Report, Porcupine Plateau Group by Bullock, Hughes & Tillman Ltd.
1–1–2–4	Preliminary Geological Report, Peel Plateau Group by Bullock & Hughes
1–1–2–5	Geological Report on Seminole Anticline, Yukon Territory by D. Bruce Bullock & Associates Ltd.
1–1–7–6	Geological Reconnaissance Report by J.C. Sproule & Associates
1–2–7–7	Photogeological Map – Mosaics for Geological Reconnaissance Report – North Great Bear Lake by J.C. Sproule & Associates
1–2–2–8	Areal Geology of the Eagle Plain Area, Yukon Territory by V. Zay Smith Associates
1–1–2–9	Geological Report, Bell River Area, Yukon Territory by D. Bruce Bullock & Associates Ltd.

Amerada Petroleum Corporation (cont'd)

Report No.	Report
1-1-6-10	Geological Report on Mackenzie & Richardson Mountains for Amerada Petroleum Corporation by D.B. Bullock
1-2-6-11	Mosaics for Geological Report on Mackenzie & Richardson Mountains for Amerada Petroleum Corporation by D. Bruce Bullock
1-1-2-12	Paleontological Interpretation of the Bear Anticline, Tatonduk River Area, Y.T. by D. Bruce Bullock & Associates Ltd.
1-1-2-13	Geological Report on part of Ogilvie Basin, Eagle Plain, Ogilvie & Richardson Mts. for Amerada Petroleum Corporation by D.B. Bullock
1-1-2-14	Mosaics for Geological Report on Ogilvie Basin & Eagle Plain for Amerada Petroleum Company by D.B. Bullock
1-1-2-15	Geological Report on the Porcupine Basin and Surrounding Area, Yukon and Northwest Territories by F.B. Hoover
1-7-2-19	Geophysical Map – Yukon Territory by S.S.C. Report

**Amoco Canada Petroleum Company Ltd.**

(Formerly Pan American Petroleum Corporation)

60-1-4-4	Surface Geology, Ft. Simpson Area, Permits 954-962 by S. Antoniuk
60-1-4-5	Surface Geology, Mackenzie River Area, Permits 954-962 by S. Antoniuk Maps in separate folder
60-2-6-6	Photogeologic Report of the Peel Plateau Project Area by J.G. Murphy
60-2-2-7	Photogeologic Report on Eagle Plain Area by J.G. Murphy
60-1-5-8	Report on Surface Geology – Hume River Area by Martin & Koch
60-1-2-9	Geological Report on Permit 1604, Y.T. by Bullock & Hughes

**Amoco Canada Petroleum Company Ltd. (cont'd)**

Report No.	Report
60-1-3-10	Report on Surface Geology, Richardson Mountains Area, Y.T. by H.J. Stewart
60-2-2-11	Photogeological Evaluation of the Porcupine Area, Y.T. by H.J. Stewart
60-1-2-12	Field Investigations, Central Ogilvie Ranges-Western Mackenzie Mountains, Yukon and Northwest Territories by Geophoto Services Ltd.
60-7-7-16	Magnetometer Survey in the Mackenzie Delta Area by Hunting Geophysical Ltd.
60-6-4-17	Report of Geophysical and Seismograph Reflection Survey on and off Trout Lake Permits 1569 and 1570 by M.A. Knock
60-2-3-18	Photogeology of the Arctic Plateau Area, Yukon & N.W.T. by V. Zay Smith.
60-1-6-19	Report on Surface Geology, Peel Plateau Area by K.E. Peterson and Stansberry
60-1-3-20	Report on Surface Geology, Arctic Mountains Area by Y. Kawase
60-1-2-21	Report on Surface Geology, Eagle Plain Area, Yukon and Northwest Territories by G.F. Stansberry
60-1-2-22	Report on Surface Geology, Richardson Mountains Area, Yukon and Northwest Territories by G.F. Stansberry & H.J. Stewart
60-1-7-23	Report on Surface Geology, Anderson River and Lower Carnwath River, Yukon and Northwest Territories by G.F. Stansberry
60-1-5-46	Field Stratigraphic Investigations, McConnell Range, Southern Franklin Mountains, N.W.T. by Geophoto Services Ltd.
60-1-2-76	Report on Surface Geologic Examinations conducted on Chevron Permits in the Yukon Territory by M.L. Larson

**Arab Oils Limited**

503-1-10-1	Summary Report, 1961, Arctic Islands Field Work by J.C. Sproule and Associates
------------	--

Atlantic Richfield Canada Ltd.

(formerly The Atlantic Richfield Company)

Report No.	Report
246-2-1-1	Reconnaissance Photogeologic Evaluation, Liard Plateau N.W.T., Yukon & B.C. by Geophoto Services Ltd.
246-1-6-2	Micropaleontology Study of Cretaceous Sections N.W.T. for Atlantic Refining Company by A. McGugan
246-1-6-3	Seep Survey Project, Glacier N.W.T. for Atlantic Refining Company by Herbert M. Stanley, Jr.
246-1-6-4	Stratigraphy of the Northern Mackenzie Mountains for Atlantic Refining Company by J.C. Sproule
246-1-6-5	Appendix to Report-Stratigraphy of Northern Mackenzie Mountains for Atlantic Refining Company by J.C. Sproule
246-1-6-6	Geological Report Ontarature River Area, N.W.T. for Atlantic Refining Company by J.C. Sproule
246-1-6-7	Mosaics Report for Geological Report for Ontarature River, N.W.T. for Atlantic Refining Company by J.C. Sproule
246-1-6-8	Mosaics Report for Geological Report for Ontarature River, N.W.T. for Atlantic Refining Company by J.C. Sproule
246-2-6-9	Photogeology Report Glacier Project for Atlantic Refining Company by K.M. Renfro
246-1-6-10	Geological Report of the Richardson Mountains – Knorr Range Area for Atlantic Refining Company by J. MacDonald
246-1-6-11	Glacier Report, Geological Report, Franklin Mts. for Atlantic Refining Company by J.S. MacDonald
246-6-6-12	Seismic Surveys – Glacier Project for Atlantic Refining Company by R.E. Whitmore

### **Atlantic Richfield Canada Ltd. (cont'd)**

This list contains all technical reports released from confidential status to the end of 1971.

Oil & Gas Land & Exploration Section

Ottawa, Canada

February 15, 1972

**SECTION B**  
**WELL REPORTS AND WELL HISTORY REPORTS**

All wells and structure test holes are released from confidential status pursuant to Section 107 of the Canada Oil and Gas Land Regulations. Exploratory wells and structure test holes are released two years after their completion or abandonment. Development wells are released thirty days after their completion or abandonment. Readers should refer to Nos. 3, 4, 5, 6, 7, 8, 9 & 10 of the "Schedule of Wells" for type of logs, cored intervals, and samples available on each well. Copies of Well History Reports and logs in microfiche jacket format may be inspected at the office of the District Conservation Engineer, 112-11th Ave. S.E., Calgary, Alberta. Original copies of the Well History Reports can be inspected only in the office of the District Conservation Engineer responsible for the district in which the well was drilled. Cores and samples can be inspected at the Institute of Sedimentary and Petroleum Geology, 3303-33rd St. N.W., Calgary, Alberta.

## Preface

All aspects of oil and gas operations in the Yukon and Northwest Territories are administered by the Department of Indian Affairs and Northern Development, specifically by the Oil and Mineral Division. Under the *Government Organization Act, 1966*, the Department is charged with fostering, through scientific investigation and technology, knowledge of the Canadian North and of the means of dealing with conditions related to its further development. It is for this reason that this list of information available for inspection has been prepared.

Information on geological and geophysical operations is submitted by operators pursuant to Sections 28 and 54 of the Canada Oil and Gas Land Regulations. Information on well drilling is submitted pursuant to Section 101 of the Canada Oil and Gas Drilling and Production Regulations. All permittee information is released pursuant to Section 107 of the Canada Oil and Gas Land Regulations.

The Oil and Mineral Division, in co-operation with the Department of Public Archives has just completed micro-filming of well-history reports for all wells drilled prior to the current season. Diazo microfiche copies of well-history reports released from confidential status, including logs and tour sheets are available from this Division. The cost is \$1.00 per microfiche sheet to a maximum of \$10.00 per well-history report. A price list for all wells released from confidential status will be available by mid-summer.

Microfilming of geological and geophysical reports is nearing completion, and when completed, microfiche copies will be made available on a similar basis, to a maximum of \$25.00 per report. Prices for geological and geophysical reports will be published in the 1974 Technical Reports.

Orders for diazo microfiche copies of well-history and geological and geophysical reports should be addressed to:

Oil and Gas Land and Exploration Section,  
Oil and Mineral Division,  
Department of Indian Affairs and  
Northern Development,  
OTTAWA Ontario  
K1A 0H4  
*Attention: Oil and Gas Operations Unit*  
Telephone No.: 613-992-0921  
Telex No.: IAND OTT 053-3711

Prepayment of orders, by cheque or money order made payable to the Receiver General for Canada is requested.

This Edition replaces all previous editions.

Oil and Gas Land & Exploration Section  
February 1, 1973

Each geological and geophysical program is identified by a code number. The code number contains the Company name, the type of work carried out, the area covered by the report, and the year the work was done. For example:

*Project No. 7-6-7-72-5*

- 7 — refers to company or operator
- 6 — refers to type of work
- 7 — refers to area worked
- 72 — refers to year work was done
- 5 — refers to numerical sequence of projects as submitted by the company or operator.

e.g.: Imperial Oil carried out a land seismic survey in the Mackenzie Delta — Anderson Plains area in 1972. This was the fifth program carried out by the company in 1972.

To assist users of Operator Reports, we have identified each report by a code number. The code number contains the Company name, the type of work carried out, and the area covered by the report. For example:

*Report No. 7-1-5-1*

- 7 — refers to company or operator
- 1 — type of work
- 5 — area worked
- 1 — numerical sequence of reports as received from companies or firms.

e.g., Imperial Oil Ltd. submitted a geological surface report on the Mackenzie Plains. It was the first report received from the Company.

1. Surface Geologic Mapping
2. Geophoto Interpretation
3. Geological Evaluation (Multiple program including sub-surface information)
4. Geochemical Surveys
5. Underwater Geological Projects (includes dredging for samples or coring)
6. Seismic (land)
7. Aeromagnetometer
8. Gravity Meter
9. Marine Seismic
10. Geophysical Projects (research oriented)
11. Wildcat Wells (includes outpost wells)
12. Development Wells
13. Service Wells
14. Structure Test Holes (stratigraphic drilling)
15. Drilling (studies or research)
16. Roads
17. Airstrips
18. Transportation
19. Pipelines
20. Communications (electronic)
21. Research
22. Environmental Studies – Ecology

1. Liard Plateau
  - Includes all of disturbed sedimentary belt in Liard area.
2. Eagle Plain
  - This would include all of central Yukon, but not Old Crow area.
  - Includes all on-shore areas.
3. Yukon Arctic Coastal Plains
4. Great Slave Plain
5. Great Bear Plain
6. Peel Plateau
7. Delta Area
8. N.W.T. & Y.T. Off-Shore Area
  - North to Latitude 63°
  - Includes Mackenzie Plains.
  - Includes Peel Plain.
  - Includes Anderson Plain.
  - Includes all off-shore areas in the Beaufort Sea-Mackenzie Bay south of Banks Island.
  - All of Arctic Islands south of Lancaster Sound.
  - Queen Elizabeth Group of Arctic Islands.
  - E.M.R. Area
  - Hudson Bay islands, Foxe Basin and off east coast of Baffin Island.
  - E.M.R. Area
  - E.M.R. Area
  - All of Y.T.
  - All of the N.W.T.
  - All of the Arctic Islands.
  - Lands administered by the Dept. of I.A. & N.D. North of 60.
9. Arctic Lowlands
10. Arctic Islands
11. Pacific Coast
12. Foxe Basin
13. Gulf of St. Lawrence
14. East Coast
15. Yukon
16. N.W.T.
17. Arctic Islands
18. Canada Lands

**Oil and Mineral Division  
Department of Indian Affairs and  
Northern Development**

**Technical Reports Available for Inspection**

Geological and Geophysical reports released from Confidential status are open for inspection and perusal at the office of the Oil and Gas Land and Exploration Section, 112 – 11th Ave., S.E., Calgary, Alberta, pursuant to Section 107 of the Canada Oil and Gas Land Regulations. In this circular the current official name of the company is used; reports from its predecessors are included under its current name.

by Velocity Surveys Ltd.
- 19-14-4-24 Progress Report on R.G. Belfoi Structure Tests, Horn Mountain Area, N.W.T.  
by Western Decalta Petroleum Limited

This list contains all technical reports released from confidential status to the end of 1972.  
Oil & Gas Land & Exploration Section, Ottawa, Canada  
February 1, 1973

**SECTION B****WELL REPORTS AND WELL HISTORY REPORTS**

All wells and structure test holes are released from confidential status pursuant to Section 107 of the Canada Oil and Gas Land Regulations. Exploratory wells and structure test holes are released two years after their completion or abandonment. Development wells are released thirty days after their completion or abandonment. Readers should refer to No. 11 of the Schedule of Wells (1921 – 1971) for type of logs, cored intervals, and samples available on each well. Copies of Well History Reports and Logs may be inspected at the office of the District Oil & Gas Conservation Engineer responsible for the district in which the well was drilled. Cores and samples can be inspected at the Institute of Sedimentary and Petroleum Geology, 3303-33 St. N.W., Calgary, Alberta. Microfilm copies of Well History Reports are available as described in the preface to this report.

**WELLS DRILLED IN THE NORTHWEST AND YUKON TERRITORIES ARRANGED BY YEAR OR COMPLETION OR ABANDONMENT**

YEAR	WELL NAME	TOTAL DEPTH
1921	Northwest Fort Norman No. 1	1,512

## Preface

All aspects of oil and gas operations in the Yukon and Northwest Territories are administered by the Department of Indian and Northern Affairs, specifically by the Oil and Minerals Division. Under the *Government Organization Act, 1966*, the Department is charged with fostering, through scientific investigation and technology, knowledge of the Canadian North and of the means of dealing with conditions related to its further development. It is for this reason that this list of information available for inspection has been prepared.

Information on geological and geophysical operations is submitted by operators pursuant to Sections 28 and 54 of the Canada Oil and Gas Land Regulations. Information on well drilling is submitted pursuant to Section 101 of the Canada Oil and Gas Drilling and Production Regulations. All permittee information is released pursuant to Section 107 of the Canada Oil and Gas Land Regulations.

The Oil and Minerals Division, in co-operation with the Department of Public Archives has completed microfilming of well-history reports for all wells drilled prior to the current season. Diazo microfiche copies of Well-History reports released from confidential status, including logs and tour sheets are available from this Division. The cost is \$1.00 per microfiche sheet to a maximum of \$10.00 per well-history report. A price list for all wells released from confidential status is included in this edition.

Microfilming of geological and geophysical reports is completed. Microfiche copies are available on a similar basis to Well-History reports, to a maximum of \$25.00 per report. Prices for geological and geophysical reports released from confidential status are included in this edition.

Orders for diazo microfiche copies of well-history and geological and geophysical reports should be addressed to:

Oil and Gas Land and Exploration Section,  
Oil and Minerals Division,  
Department of Indian and Northern Affairs,  
112 – 11th Ave., S.E.,  
Calgary, Alberta.  
T2G 0X5

*Attention: Oil and Gas Operations Unit*  
Telephone No.: 403-264-0201

Prepayment of orders, by cheque or money order made payable to the Receiver General for Canada is requested. This Edition replaces all previous editions.

Oil and Gas Land & Exploration Section.  
June 1, 1974.

Each geological and geophysical program is identified by a code number. The code number contains the Company name, the type of work carried out, the area covered by the report, and the year the work was done. For example:

*Project No. 7-6-7-73-5*

- 7 – refers to company or operator
- 6 – refers to type of work
- 7 – refers to area worked
- 73 – refers to year work was done
- 5 – refers to numerical sequence of projects as submitted by the company or operator.

eg: Imperial Oil carried out a land seismic survey in the Mackenzie Delta – Anderson Plains area in 1973. This was the fifth program carried out by the company in 1973.

To assist users of Operator Reports, we have identified each report by a code number. The code number contains the Company name, the type of work carried out, and the area covered by the report. For example:

*Report No. 7-1-5-1*

- 7 – refers to company or operator
- 1 – type of work
- 5 – area worked
- 1 – numerical sequence of reports as received from companies or firms.

eg: Imperial Oil Ltd. submitted a geological surface report on the Mackenzie Plains. It was the first report received from the Company.

**Oil and Minerals Division  
Department of Indian and  
Northern Affairs**

**Technical Reports Available for Inspection**

Geological and Geophysical reports released from Confidential status are open for inspection and perusal only at the office of the Oil and Gas Land and Exploration Section, 112 – 11th Avenue S.E., Calgary, Alberta, pursuant to Section 107 of the Canada Oil and Gas Land Regulations. Microfilm copies of Geological and Geophysical reports are also available for inspection or perusal at that office, or they may be purchased as described in the preface to this report.

In this circular the current official name of the company is used; reports from its predecessors are included under its current name. The report code number is not, however, changed from that of the predecessor.

## **SECTION B**

### **WELL REPORTS AND WELL HISTORY REPORTS**

All wells and structure test holes are released from confidential status pursuant to Section 107 of the Canada Oil and Gas Land Regulations. Exploratory wells and structure test holes are released two years after their completion or abandonment. Development wells are released thirty days after their completion or abandonment, or on the date of release of the original discovery well, whichever comes later.

Readers should refer to No. 11, 12 and 13 of the Schedules of Wells (1921-71, 1970-72, 1971-73 respectively) for type of logs, cored intervals, and samples available on each well.

Hard (Paper) copies of Well-History Reports and logs may be inspected only at the office of the District Oil & Gas Conservation Engineer responsible for the District in which the well was drilled. Micro-film copies of all Well-History Reports may be inspected at the office of the Oil and Gas Land & Exploration Section, 112 – 11th Avenue S.E., Calgary, Alberta. Cores and samples may be inspected at the Institute of Sedimentary and Petroleum Geology, 3303 – 33rd St. N.W., Calgary, Alberta. Microfilm copies of Well History Reports are available for purchase as described in the preface to this report.

**CATALOGUE OF WELLS RELEASED  
FROM CONFIDENTIAL STATUS**

**WELLS DRILLED IN THE NORTHWEST TERRITORIES AND YUKON  
ARRANGED ALPHABETICALLY BY OIL COMPANIES**

Catalogue No. R71-8/1975  
IAND Publication No. 8114-000-EE-A1

# Preface

All aspects of oil and gas operations in the Yukon and Northwest Territories are administered by the Department of Indian and Northern Affairs, specifically by the Oil and Minerals Division. Under the Government Organization Act, 1966, the Department is charged with fostering, through scientific investigation and technology, knowledge of the Canadian North and of the means of dealing with conditions related to its further development. It is for this reason that this list of information available for inspection has been prepared.

Information on geological and geophysical operations is submitted by operators pursuant to Sections 28 and 54 of the Canada Oil and Gas Land Regulations. Information on well drilling is submitted pursuant to Section 101 of the Canada Oil and Gas Drilling and Production Regulations. All permittee information is released pursuant to Section 107 of the Canada Oil and Gas Land Regulations.

The Oil and Minerals Division, in co-operation with the Department of Public Archives, microfilms well-history reports for all wells drilled. Diazo microfiche copies of Well-History reports released from confidential status, including logs and tour sheets are available from this Division. The cost is \$1.00 per microfiche sheet to a maximum of \$10.00 per well-history report. A price list for all wells released from confidential status is included in this edition.

Microfilming of geological and geophysical reports is similarly done on a continuous cycle. Microfiche copies are available on a similar basis to Well-History reports, to a maximum of \$25.00 per report. Prices for geological and geophysical reports released from confidential status are included in this edition.

Orders for diazo microfiche copies of well-history and geological and geophysical reports should be addressed to:

Oil and Gas Geology and Operations Section  
Oil and Minerals Division,  
Department of Indian and Northern Affairs,  
112 - 11th Avenue S.E.,  
CALGARY, Alberta  
T2G 0X5  
Attention: Oil and Gas Operations Unit  
Telephone No.: 403-231-5631

Prepayment of orders, by cheque or money order made payable to the Receiver General for Canada, is requested. This edition replaces all previous editions.

Oil and Gas Geology and Operations Section  
June 1, 1976

# Coding of Projects

# Coding of Reports

Each geological and geophysical program is identified by a code number. The code number contains the Company name, the type of work carried out, the area covered by the project and the year the work was done. For example:

*Project No. 7-6-7-73-5*

7 — refers to company or operator  
6 — refers to type of work  
7 — refers to area worked  
73 — refers to year work was done  
5 — refers to numerical sequence of projects as submitted by the company or operator to the Department.

e.g. Imperial Oil carried out a land seismic survey in Mackenzie Delta — Anderson Plains area in 1973. This was the fifth program carried out by the company in 1973.

To assist users of Operator Reports, we have identified each report by a code number. The code number contains the Company name, the type of work carried out, and the area covered by the report. For example:

*Report No. 7-6-7-98*

7 — refers to company or operator  
6 — refers to type of work  
7 — refers to area worked  
98 — numerical sequence of reports as received from companies or firms.

# Type of Exploratory Work

*Code No. Type of Work*

- 1 Surface Geologic Mapping
- 2 Photogeologic Interpretation
- 3 Geological Evaluation (Multiple program including subsurface information)
- 4 Geochemical Surveys
- 5 Underwater Geological Projects (includes dredging for samples or coring)
- 6 Seismic (land), includes on-ice seismic
- 7 Aeromagnetometer
- 8 Gravity Meter
- 9 Marine Seismic
- 10 Geophysical Projects (research oriented)
- 11 Exploratory Wells (includes outpost wells)
- 12 Development Wells
- 13 Service Wells
- 14 Structure Test Holes (stratigraphic drilling)
- 15 Drilling (studies or research)
- 16 Roads
- 17 Airstrips
- 18 Transportation
- 19 Pipelines
- 20 Communications (electronic)
- 21 Research (physical state)
- 22 Environmental Studies — (ecology — biology)

# Geological Areas

<i>Code No.</i>	<i>Area</i>	<i>Description</i>	<i>7</i>	<i>Delta</i>	<i>— Includes all on-shore areas of the Mackenzie Delta and the Anderson Plain north of 67°30'N.</i>
1	Liard Plateau	— Includes all of the disturbed sedimentary belt in the Yukon Territory south of the Eagle Plain.	8	Beaufort Sea	— Includes all off-shore areas in the Beaufort Sea — Mackenzie Bay — Amundsen Gulf south of Banks Island (72°N)
2	Eagle Plain	— Includes all of the central Yukon to the Old Crow Basin	9	Arctic Lowlands	— All of Arctic Islands south of Lancaster Sound.
3	Yukon Arctic Coastal Plain	— Includes all on-shore areas of the Yukon north of the British and Richardson Mountains, and the Old Crow Basin	10	Arctic Islands	— Queen Elizabeth Group of Arctic Islands
4	Great Slave Plain	— Includes the Mackenzie Plain and the Mackenzie Mountains south of 63°N, and the Liard Plateau in the Northwest Territories.	11	Pacific Coast	— E.M.R. Area
5	Great Bear Plain	— Includes the Mackenzie Plain and the Mackenzie Mountains north of 63°N and the Franklin Mountains.	12	Foxe Basin	— Hudson Bay Islands, Foxe Basin and off east coast of Baffin Island
6	Peel Plateau	— Includes the Peel Plain and the Peel Plateau within the Northwest Territories and the Anderson Plain south of 67°30'N.	13	Gulf of St. Lawrence	— E.M.R. Area
			14	East Coast	— E.M.R. Area
			15	Yukon	— All of Y.T.
			16	N.W.T.	— All of the N.W.T.
			17	Arctic Islands	— All of the Arctic Islands
			18	Canada Lands	— Lands administered by the Dept. of I.A. & N.D. North of 60.

# Oil and Minerals Division

## Department of Indian and Northern Affairs

### **Technical Reports Available for Inspection**

Geological and Geophysical reports released from Confidential status are open for inspection and perusal only at the office of the Oil and Gas Geology and Operations Section, 112 - 11th Avenue S.E., Calgary, Alberta, pursuant to Section 107 of the Canada Oil and Gas Land Regulations. Microfilm copies of Geological and Geophysical reports are also available for inspection or perusal at that office, or they may be purchased as described in the preface to this report.

In this circular the current official name of the company is used; reports from its predecessors are included under its current name. The report code number is not, however, changed from that of the predecessor.

## WELLS DRILLED IN THE NORTHWEST TERRITORIES AND YUKON ARRANGED ALPHABETICALLY BY OIL COMPANIES TO DECEMBER 31, 1975

Well Name	Year Completed	T.D.	Page	Schedule No.	D.A.	Cost*
<b>Amerada Hess Corporation</b>						
Amerada et al Crown Bell River						
"YT-A" No. 1	1960	8,004	201	11	83	\$ 10.00
Amhess Gulf Redknife E-55	1970	4,807	38	11	395	\$ 4.00
<b>Amoco Petroleum Company Canada Ltd.</b>						
Amoco et al Carcajou K-68	1972	4,515	44	12	577	\$ 7.00
Amoco Murphy Cormack N-33	1970	6,258	63	11	409	\$ 7.00
Amoco PCP A-1 Cranswick A-22	1972	9,413	45	12	540	\$10.00
Amoco PCP B-1 Cranswick YT A-42	1973	14,000	85	13	597	\$10.00
Amoco B-1 East Flett H-13	1973	2,910	10	13	661	\$ 4.00
Amoco Flett N-19	1969	4,900	40	11	372	\$ 7.00
Amoco et al Inuvik D-54	1969	5,126	166	11	377	\$ 9.00
Amoco Pointed Mountain P-24	1972	5,387	12	12	576	\$ 8.00
Amoco B-2 Pointed Mountain F-38	1973	15,331	9	13	604	\$10.00
Amoco Pointed Mountain A-55	1974	12,326	9	14	746	\$10.00
Amoco et al Poplar River G-32	1970	4,988	70	11	412	\$ 8.00
Amoco et al Red Dog K-29	1972	7,050	36	12	561	\$10.00
<b>Aquitaine Company of Canada Limited</b>						
Aquit Brackett L. C-21	1973	5,041	29	13	622	\$ 8.00
Aquit Amhess Dodo Canyon K-03	1972	9,010	41	12	552	\$10.00
Aquit Highland L. I-23	1973	2,735	19	13	648	\$ 3.00
Aquit Highland L. K-42	1973	3,849	19	13	649	\$ 5.00
Aquit Old Fort Point E-30	1973	2,583	27	13	620	\$ 4.00
Aquitaine et al Rowley N-14	1971	1,755	176	11	531	\$ 3.00
Aquit Silvan Plateau G-41	1974	6,950	14	14	710	\$ 8.00
<b>Atkinson Petroleum Limited</b>						
Atkinson Union Island River G-42	1971	7,912	21	11	474	\$ 5.00
Atkinson et al Island River I-63	1972	6,278	14	12	579	\$ 4.00
Atkinson et al Island River J-44	1970	7,038	8	11	399	\$ 5.00
Atkinson et al Trainor Lake F-48	1971	6,533	27	11	486	\$ 3.00
Atkinson et al Trout L. H-57	1973	6,908	8	13	660	\$ 5.00
Atkinson CSP Trout Lake M-51	1971	7,262	27	11	506	\$ 5.00
<b>Atlantic Richfield Canada Ltd.</b>						
Atlantic S.W. Airport Creek No. 1	1960	2,385	154	11	89	\$ 2.00
Atlantic et al Beavertail G-26	1966	4,900	151	11	205	\$ 7.00
Atlantic Circle No. 1	1961	2,660	155	11	96	\$ 2.00
Atlantic N. Circle River No. 1	1961	2,266	154	11	90	\$ 2.00
Atlantic Little Chicago N-32	1966	6,422	161	11	235	\$ 8.00
ARCO et al Hume River D-53	1972	4,159	46	12	539	\$ 6.00
ARCO Lost Hill Lake F-62	1972	4,566	45	12	537	\$ 9.00
Atlantic et al Manitou Lake L-61	1966	5,675	153	11	204	\$ 9.00
ARCO et al Mountain River H-47	1972	3,427	46	12	538	\$ 7.00
Atlantic et al Arctic Circle
